

The ASP Time Fractal of 28080 and the Maha Kalpa Fractal 31104

ASP - Arcturian Shield Program

The ASP time fractal has come to be through the observation of the geometric frequencies emanated by each of the facets of the Torch of Life Galdrastrafr. Below are the frequencies of the Galdrastrafr followed by their alchemical blending which produces the time fractal of the ASP year and it's greater ages.

Galdrastrafr Geometric Number Emanations

Runic Formula = 65

Bindrunes = 48

Crystal Power Store = 72

Silent Pyramid Base = 4

Silent Capstone Base = 4

Centre = 1

Galdrastrafr Geometric Number Emanations Through the Stargate (x 3)

Runic Formula = 195

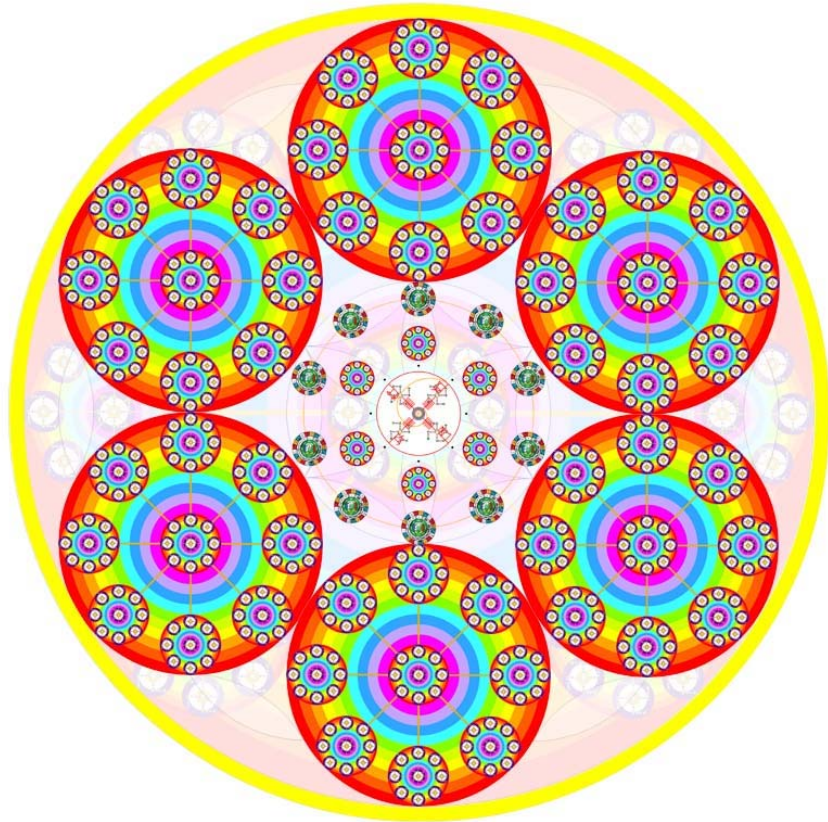

Bindrunes = 144

Crystal Power Store = 216

Silent Pyramid Base = 12

Silent Capstone Base = 12

Centre = 1

The Primary Fractal = 28,080 days

The Primary Fractal cycle is produced through the alchemy of the Runic Formula multiplied by the Bindrunes, through the Stargate. $195 \times 144 = 28080$ (One ASP Year) (76.8 Earth Years)

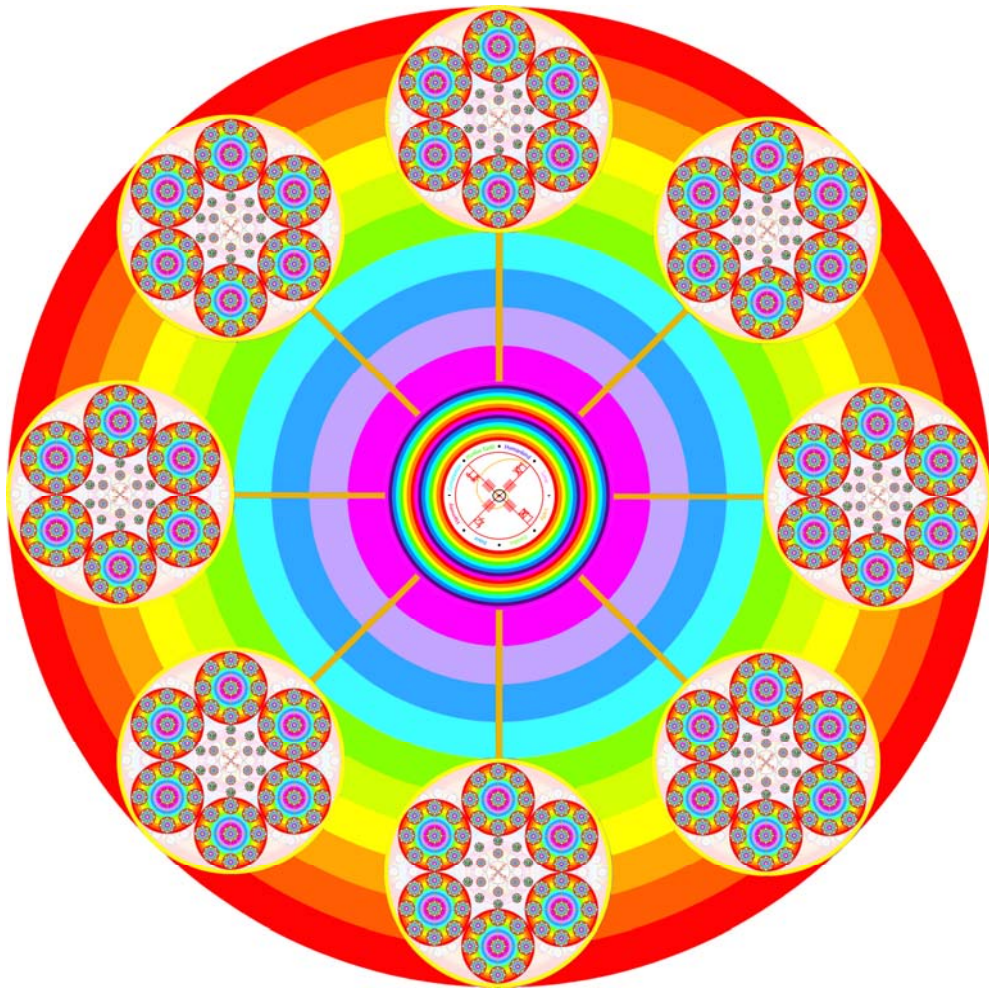

28080 is divisible by 33 whole numbers between 1 to 108
78 whole numbers not including 1 and 28080

That is there are 40 pairs of numbers that together equal
28080 when multiplied together.

1 ASP Year Encompasses 13 'Months' of 2160 (20 x 108) days

1 ASP Year Encompasses 20 Watches of the
Tribes of Time 1404 (13 x 108) days

It is the number 28080 which is observed through day keeping
(on a day to day basis).

The Octahedron Psi-Bank = 224,640 days

There are 8 ASP Years to 1 Octahedron Psi Bank. $28080 \times 8 = 224640$

$$224640 / 2080 = 108$$

$$224640 = 615.01 \text{ Earth Years}$$

The above image is a representative of the image below where each ASP year completes one face of an octahedron.

Each Kin in the Octahedron Psi-Bank (2080)
represents 108 Kin Earth Days

The ASP Age = 2,021,760 days

2021760 kin equate to 9 Octahedron Psi Banks or 1 ASP Age.

This is 72 ASP Years.

The ASP Age is one third of the Trinity.

There are 432 ASP Ages to 1 Great ASP Age

$432 (108 \times 4) \times 2021760 = 873400320$ kin

There are 6912 ASP Ages to 1 ASP Aeon

$6912 (108 \times 64) \times 2021760 = 13974405120$ kin

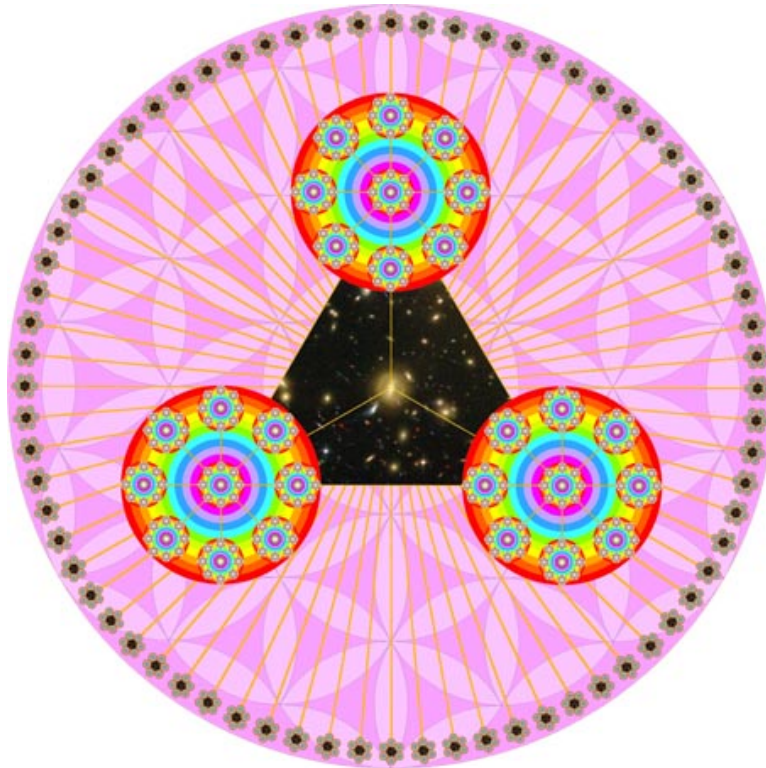

The Trinity = 6,065,280 days

The ASP Year (28080 kin) is multiplied by the frequency of the Crystal Power Store (216) to produce one Trinity.

$195 \times 144 \times 216 = 6065280$ (Kin in one Trinity)
 Within the Trinity are 27 Octahedron Psi Banks.

$6065280 / 27 (3 \times 9) = 224640$ or 615.01 Earth Years
 The Trinity is 216 ASP Years or 16606.1 Earth Years
 $216 (2 \times 108) \times 28080 = 6065280$

6065280 days are referred to as a Trinity because it comprises 3 cycles of 2021760 kin.
 Each of these 3 cycles = 9 Octahedron Psi Banks.

The Great Age / Chiliocosm = 873,400,320 days
 31104 ASP years (31104 x 28080)

The ASP has a fractal **key-code** to the Yugas of the Vedic ages. The Numbers 108, 360, 432, 864, 1296 and 31104 are all a part of the ASP time fractal . The Maha Kalpa (See bottom of page "From: A Treatise on Cosmic Fire"), 311,040,000,000,000 (whole period of Brahma's age in our years), is fractally identical to the number of ASP years in a Great ASP Age. That is to say that if one removes all the zeros it is the same number, 31104. This relationship is called fluid number harmonics. The Great Age is found through multiplying:

Runic Formula x Bindrunes x Crystal Power Store x Base of Silent Pyramid x Base of Silent Capstone x The Central Point = 873400320

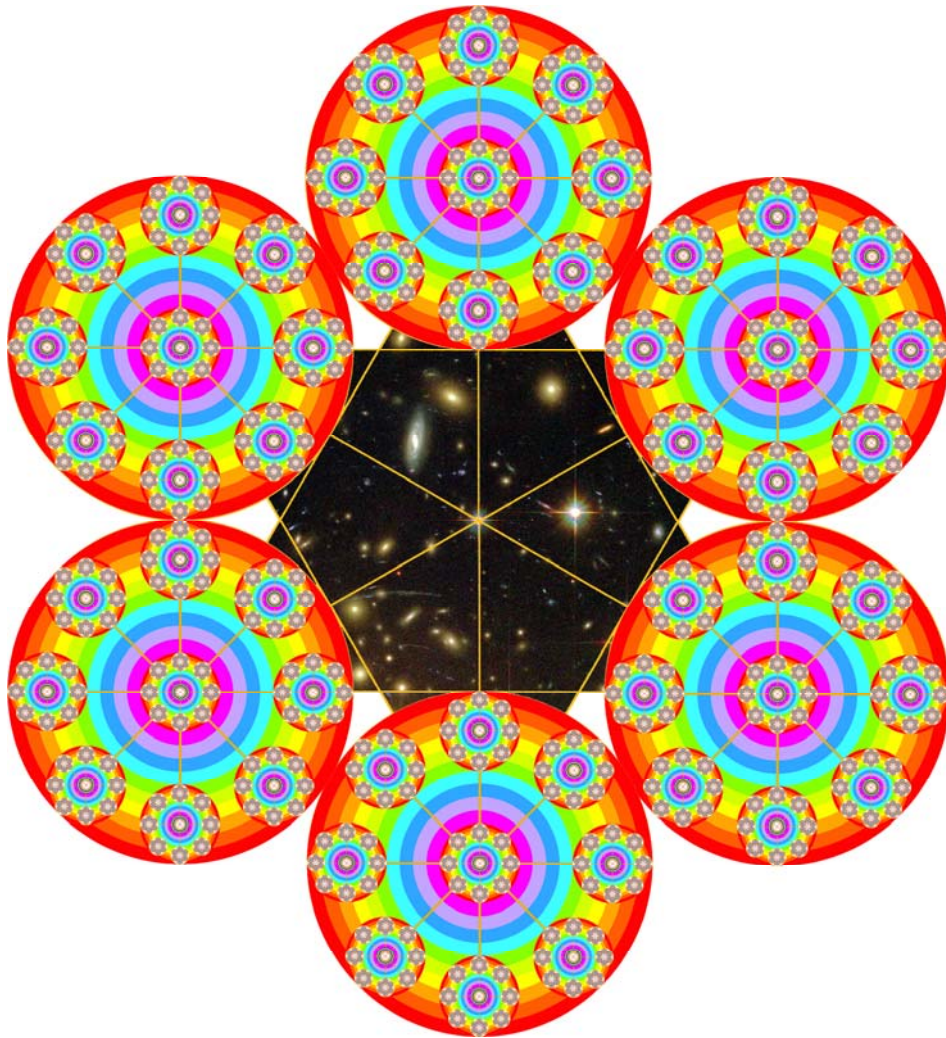

or

$$195 \times 144 \times 216 \times 12 \times 12 \times 1 = 873400320 = 28080 \times 31104$$

The Trinity (6065280) is multiplied by the base of the Silent Pyramid (12) and again by the base of the Silent Capstone (also 12)

to produce 1 Great Age or 1 Chiliocosm

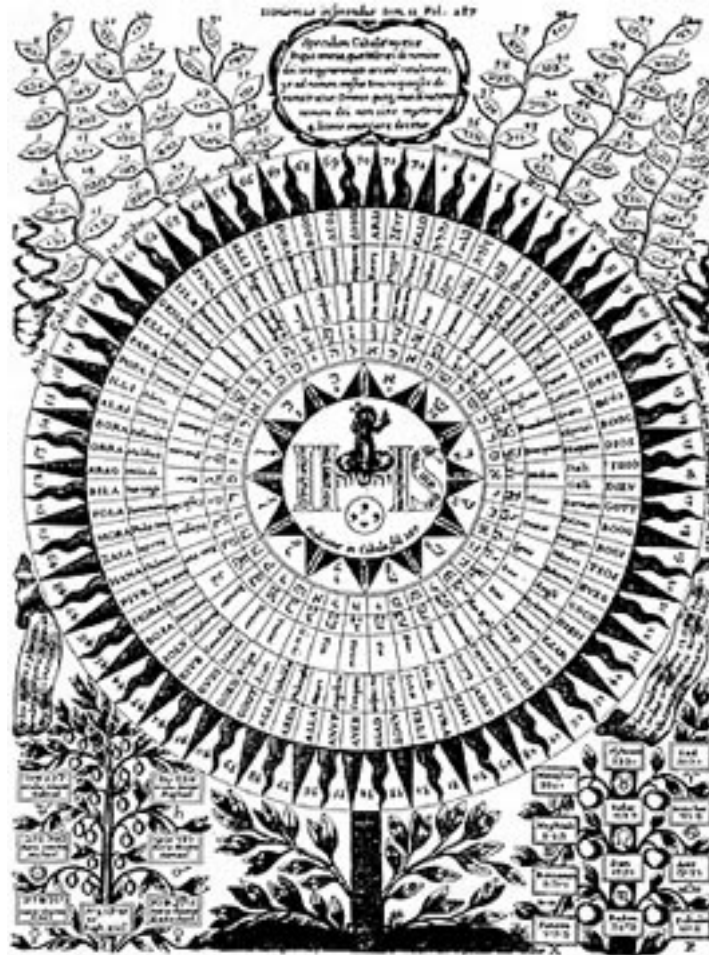

1 Great Age equates to 1866240 Worlds of the Lords of Time (468)

'Seal of David' or Double Trinity

$$144 \times 6065280 \text{ (Trinity)} = 873400320$$

The ASP Great Age / Chiliocosm graphic above shows 72 Seals of David (6 pointed star, 2 Trinities) of 12130560 kin per Seal. Each of these 72 Seals of David can be seen to be emanating in rays from the primal Monad (Eye of Isness). These Seals are shown in the above Chiliocosm image at the outer points of the 72 rays. The 72 Rays of the Monad are each associated with one of the 72 Names of God in Hebrew-Aramaic.

From Kircher's OEdipus Aegyptiacus

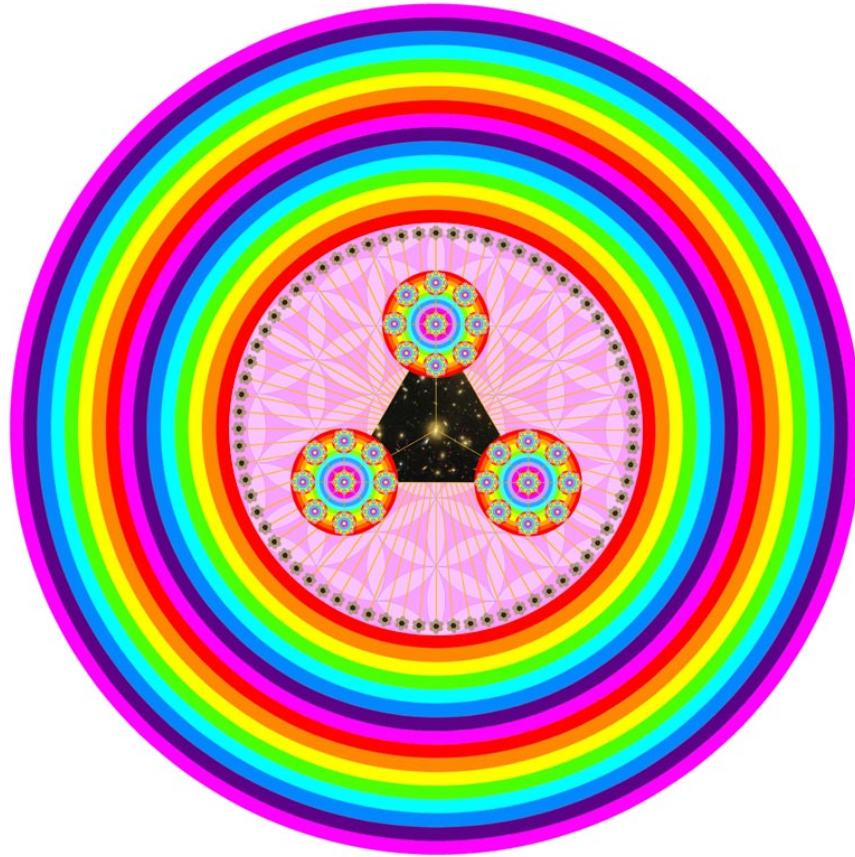

In Earth Years a Great Age equates to: -

$$873400320 / 365.242 = 2,391,292.1$$

That is: - Two Million, Three Hundred and Ninety One Thousand, Two Hundred and Ninety Two Earth Years per Great Age

Chiliocosm: means 1000's of worlds. Within the ASP are cycles of 468 kin which I refer to as 1 World of the Lords of Time ($9 \times 52 = 468$). In each ASP year there are 60 such cycles. In one Trinity there are 12960 (see Treta Yuga below) such cycles.

$$873400320 / 28080 = 31104 \text{ ASP Years Per Great Age}$$

The Aeon = 13,974,405,120 days

The Largest Cycle of the ASP is 1 Aeon. Each of the 16 Great Ages of the ASP move through one of the Rainbow Rings of the Torch of Life.

$$16 \text{ (Rainbow Rings)} \times 31104 \text{ (ASP Years or 1 Great Age)} = 497664$$

$$497664 \text{ ASP years} = 1 \text{ Aeon } 873400320 \times 16 = 13,974,405,120$$

$$\text{Day Cycles in 1 Aeon } 13974405120 / 468 = 29,859,840 \text{ Worlds}$$

$$\text{of the Lords of Time (468 days)}$$

$$13974405120 / 260 = 53,747,712 \text{ Cycles of the Tzolkin (260 kin)}$$

In Earth Years this equates to: -

$$13974405120 / 365.242 = 38,260,674.07$$

Thirty Eight Million, Two Hundred and Sixty Thousand, Six Hundred and Seventy Four Earth Years per ASP Aeon.

Every Great Age of the ASP encompasses 31104 ASP years. Each ASP year is counted as 1 in the view of the Great Ages. This 1 is a singular pulse with duration of 28080 kin. The Great Age is a continuous transmission of Now coded to the light harmonic of our World.

$$31104 / 108 = 288 \text{ (Earth Light Harmonic)}$$

$$31104 / 216 = 144 \text{ (Polar Light Harmonic)}$$

By Ormungandr Melchizedek

Addendum As the ASP is a fractal, each kin of 28080 can be seen to be, simultaneously, a day, a year or a thousand years ad infinitum. It is infinitely expandable and contractible. What this does is to remind us that the present is all the Time there is and that all the Time that is emanates from this moment. The Arcturian Shield Program is further proof that Time is radial and that its form is that of the Tzolkin of 260 kin.

From: A Treatise on Cosmic Fire

Section One - Introductory Remarks

Fire in the Macrocosm by Alice Bailey and Djwhal Khul

"One day out of the long life of Brahma is called a Kalpa; and a Kalpa is that portion of time which intervenes between one conjunction of all the planets on the horizon of Lanka, at the first point of Aries, and a subsequent similar conjunction. A Kalpa embraces the reign of fourteen Manus, and their sandhis (intervals); each Manu lying between two sandhis. Every Manu's rule contains seventy-one Maha Yugas, - each Maha Yuga consists of four Yugas, viz., Krita, Treta, Dwapara, and Kali; and the length of each of these four Yugas is respectively as the numbers, 4, 3, 2 and 1.

The number of sidereal years embraced in the foregoing different periods are as follows:

Mortal Years: 360 Days of mortals make 1 Earth year: 1

Krita Yuga contains: 1,728,000

Treta Yuga contains: 1,296,000

Dwapara Yuga contains: 864,000

Kali Yuga contains: 432,000

The total of the said four Yugas constitute a Maha Yuga: 4,320,000

Seventy-one of such Maha Yugas form the period of the reign of one Manu: 306,720,000

The reign of 14 Manus embraces the duration of 994 Maha Yugas, which is equal to: 4,294,080,000

Add Sandhis, i.e.intervals between the reign of each Manu, which amount to 6 Maha Yugas, equal to : 25,920,000

The total of these reigns and interregnums of 14 Manus, is 1,000 Maha Yugas, which constitute a Kalpa, i.e., One day of Brahma, equal to : 4,320,000,000

As Brahma's night is of equal duration, one day and night of Brahma will contain : 8,640,000,000 Three Hundred of such days and nights make one year of Brahma, equal to : 3,110,400,000,000

100 of such years constitute the whole period of Brahma's age, ie., Maha Kalpa : 311,040,000,000,000

That these figures are not fanciful, but are founded upon astronomical facts, has been demonstrated by Mr. Davis, in an essay in the Asiatic Researches; and this receives further corroboration from the geological investigations and calculations made by Dr. Hunt, formerly President of the Anthropological Society, and also in some respects from the researches made by Professor Huxley.

Great as the period of the Maha Kalpa seems to be, we are assured that thousands and thousands of millions of such Maha Kalpas have passed, and as many more are yet to come. (Vide Brahma-Vaivarta and Bhavishyre Puranas; and Linga Purana, ch. 171, verse 107, &c.) and this in plain language means that the **Time past is infinite and the Time to come is equally infinite**. The Universe is formed, dissolved, and reproduced, in an indeterminate succession (Bhagavad Gita, VIII, 19). - The Theosophist, Vol. VII, p. 11 15."
